STANDALONE STATION ✳ 8 PORTS ✳ LCD TOUCHSCREEN

Discover our standalone docking station with integrated computer, designed to meet the highest standards in security and digital evidence management.

With a comprehensive set of advanced features, this docking station is far more than a simple storage device — it is a complete evidence management workstation.

Automatic File Upload: Streamline your workflow with automatic transfer of camera files directly to the internal hard drive, enabling efficient data management without manual intervention

Flexible Management: Monitor and manage up to 8 cameras simultaneously, ensuring full operational oversight and optimized resource control.

Effortless Charging: Automatic battery charging ensures maximum equipment availability while minimizing operational downtime.

Intuitive Interface: Interact easily with the station via its 8" LCD touchscreen running MS-Windows, delivering a smooth and user-friendly experience.

Enhanced Security: Protect sensitive data with password-secured storage, ensuring the confidentiality and integrity of recorded footage.

Automated Maintenance: Simplify storage management with automatic deletion of recorded files after a predefined retention period (e.g., one month), supporting efficient storage usage and regulatory compliance.

Universal Compatibility : Easily integrate the docking station with our Digital Evidence Management software* [SGPN] (*), ensuring seamless compatibility for centralized management of cameras, users, and digital evidence:
